

Adult Tube FAQ's

- **Can you advise on hosting?**

Hosting is obviously a critical parting of your website and there are hundreds of options out there. As you are going to be hosting adult content you need to check any potential options for restrictions on what you can host. i.e. are they adult friendly.

[Hostgator](#) provides good reliable hosting which is Adult friendly, I have used [Hostgator](#) for over 10 years with no issues and I always find there customer service friendly and easy to contact.

Follow this [link](#) and enter the promo code PJWDIGITAL for the best possible deal on hosting with [Hostgator](#) (this is an affiliate link using this does support my business). Hostgator will also provide you with a domain name for 12 months with your initial order.

- **How can I monitorise the site?**

Banner Ads!! The site is optimized for you to add Banner Ads from partners you wish to work with – they are incredible easy to add and change as offers change and the traffic to your site evolves. You get these banner ads through sites such as: [Crakrevenue](#), [PlugRush](#), and [JuicyAds](#).

- **Can you make a BBW site or PAWG or Blondes Site?**

Yes, the site can be tailored to any niche and it is advisable to make your site a niche related site as opposed to a general site, as it is easier to pick up quality traffic to a niche site.

- **How do I pick a Niche?**

Initially I would say pick a niche that suits your own interests. It's always easier to work on a project or job when you are interested in the subject. If you are struggling for ideas it's good to look at this link (<https://www.xvideos.com/tags>) This page gives you an idea of what are the current popular niches are.

- **How do pick a domain name?**

This is down to your imagination, however I would make 1 or 2 recommendations.

1. Try to pick a .com this are the most popular domain out there and that what most people still think of with a domain name
2. Avoid duplication if the domain name you want is taken as .com don't just pick the .net or .co.uk if its available. It will confuse visits, potentially cause you use visitors or even just make you look like inferior version of an existing site.
3. Try keep in short and catchy.
4. If you can use your niche in the domain name eg if it's MILF site something like hotmilfs.com, if teen sexyteens.com you get the picture.

- **What about SEO?**

The site I will provide you with is fully functional and optimised for SEO. And I will provide with the delivery a short guide to Adult SEO for you to take your first steps to be an Adult webmaster.

- **Do You have example sites?**
